About me

A dedicated and analytical Information Systems student at Pembangunan Jaya University with a strong interest in systems analysis, data management, and developing technology driven business solutions. Possesses hands-on experience in Requirements Engineering and business process analysis for MSMEs. Adaptable, detail oriented, and a collaborative team player ready to contribute effectively to IT related roles.

Education

Pembangunan Jaya Unversity **2023 - Present**

Major : Information System | GPA : 3.25 / 4.00

Experiences

2025 | Freelance | GIDHUB (Great Innovation Day HUB)

- Managed and optimized audio and video transmission to ensure seamless live streaming on the platform.
- Monitored technical setups and resolved real-time broadcasting issues to maintain high-quality streams.

2024 | Member of PDD | HIMASIF

- Captured high-quality visual content and managed documentation for various HIMASIF events.
- Served as the primary technical operator, overseeing equipment and system setups during live events.

2023 | Freelance | Calorify

- Annotated and labeled image datasets using the Labelme application to convert images into structured JSON format.
- Prepared high-quality training data optimized for IoT sensor development and machine learning models.

Projects

ETL Process Attendance List - using PostgreSQL, Pentahoo, PowerBI

Extract data from CSV to Pentahoo for showing output table then load to PostgreSQL for update data, create dimension and transform data then using PowerBI for visualization data.

Student performance prediction - using Machine Learning Linear Regression

Using Python to build a predictive model from Student records cleaned data, conducted an 80:20 train-test split, and selected Linear Regression as the best model to forecast grades based on study hours and stress levels.

Skills

MySQL | Power BI | Python | Tableau | Pentahoo | Excel
